PROFESSIONAL SUMMARY

I am an IT Support Engineer with over three years of hands-on experience in customer-focused desktop support, device deployment, and second line technical assistance across a large UK university. I enjoy problem solving, take full ownership of my work, and consistently look for ways to share knowledge and help those around me develop. I hold an MSc in IT Security from Nottingham Trent University and am actively building on my technical skills through ongoing certification.

TECHNICAL SKILLS

Operating Systems and Devices - Windows 10/11, macOS, iOS, Android, PCs, laptops, tablets, peripherals
Microsoft Stack - Microsoft 365, Active Directory, Azure AD, Entra ID, Teams, SharePoint, Azure AZ-900 in progress
Service Management - ITIL v4 in progress, SLA compliance, Zendesk, Jira, Microsoft Dynamics, escalation management
Networking and Security - TCP/IP, DNS, DHCP, VPN, wireless networks, SIEM fundamentals, access control
Scripting - Python certified, PowerShell fundamentals

PROFESSIONAL EXPERIENCE

IT Support analyst

November 2024 – August 2025

Nottingham Trent University

- I deployed, configured, maintained, and decommissioned a wide range of end user devices including desktop PCs, laptops, tablets, and peripherals using structured lifecycle management processes, ensuring accurate asset records were maintained from procurement through to secure disposal.
- I diagnosed and resolved second line incidents across Windows 10 and 11, Microsoft 365, Outlook, Active Directory, VPN, and network connectivity, keeping clear case records in Zendesk and Microsoft Dynamics throughout, and using RDP to support remote users without on-site delays.
- I maintained audio visual equipment across teaching spaces and meeting rooms, including classroom projectors, interactive whiteboards, Microsoft Teams Rooms, and Zoom Rooms, carrying out regular checks and resolving faults quickly before sessions started to avoid disruption to academic activity.
- I administered Active Directory and Microsoft 365 accounts for staff and students, handling user provisioning, password resets, access control, and onboarding, while documenting recurring incident resolutions in the knowledge base to help the whole team resolve similar faults faster.
- I consistently achieved 95 percent or above SLA compliance across 30 plus incidents daily by prioritising workloads effectively, escalating complex issues with clear handover notes, and keeping users informed at every stage of the resolution process in line with ITIL good practice.

IT Support Technician

Mani Maligai Supermarket

June 2020 – July 2022

- I provided independent IT support to 20 to 30 staff users in a live retail environment, installing and maintaining desktop computers, POS systems, barcode scanners, receipt printers, and Wi-Fi routers, and diagnosing Windows-based software faults and peripheral issues using structured troubleshooting.
- I managed user account administration and access control, coordinated with external vendors on complex escalations, and maintained accurate records of all faults and resolutions to support continuity and identify recurring issues across IT systems.
- I configured and maintained networked devices including routers and CCTV-connected systems, ensuring reliable connectivity across the site and resolving network faults with minimal disruption to daily operations.

EDUCATION

Master's Degree in IT Security Nottingham Trent University **July 2024**

Bachelor's Degree in Computer Science Sri Krishna Arts and Science College **June 2023**

CERTIFICATIONS

- Microsoft Azure Fundamentals AZ-900 — in preparation
- ITIL v4 Foundation (In Progress)
- Cybersecurity Analyst Simulation – Mastercard
- Identity and Access Management – TATA
